

CASE STUDY

WHEN THE SIZE MATTERS - NUOVA MECCANICA LATINA S.R.L. - BORGIO SAN MICHELE (LT)

”

Why did you choose Technology?

The extra large working size of this machine, allows a detailed and precise processing on large sheets with consequent speed in the avoidance of targeted job orders. The high technology and the practical use, moreover, allows the operators to manage it autonomously giving at the end a good quality-price ratio. A machine to recommend.

Pasquale CIOÈ

Owner, NUOVA MECCANICA LATINA

NUOVA MECCANICA LATINA S.r.l. is a reality operating in the field of boxes, cabinets and cabins production prepared for the assembly and protection of equipment OF automation, control, command, communication and electrical distribution.

**Company name**

NUOVA MECCANICA LATINA

Founded

1982

Address

Via Pontina, 7, 04100 Scopeto Madonna Giulia LT

Sitewww.nuovameccanicalatina.it

Founded in 1982 by the witty and farsighted entrepreneurial culture of Mr. Pasquale Cioè, that over time has acquired an incomparable experience put at the service of a demanding clientele who knows how to find in the NML products the precise response tailored to her needs. The relationship between N.M.L. and TECHNOLOGY Italiana is born around 1994 with the purchase of the first manual punching machine TK810 arriving to the summer of 2017 with the delivery of the servo-electric TP Zeta 3616: at the moment its production department has three TECHNOLOGY machines, as well as a machining center, lasers and press brake of other prestigious brands.

Mr. Cioè explains to us which particular production requirement led him to purchase the last punching machine that was realized with an extra-large work area of 1500x4200 mm.

The extra large working size of this machine, allows a detailed and precise processing on large sheets with consequent speed in the avoidance of targeted job orders. The high technology and the practical use, moreover, allows the operators to manage it autonomously giving at the end a good quality-price ratio. A machine to recommend.

It is superfluous to point out to the readers that we are proud and pleased of the trust placed in us by Mr. Cioè, participating in the growth and success of his company, providing all the technical and commercial support and offering the best solution to its production needs.
